AGFAPHOTO

3-piece Professional Multi Coated Filter Kit

Ultraviolet (UV) + Circular Polarizer (CPL) + Warming (intensifier)

Bonus!
Filter Pouch

APFTK58
UPC#: 811709016496

Ultraviolet Multi Coated filter (UV)

- Protects your lenses from dust, moisture and scratches, which can lead to costly repairs.

Circular Polarizing Multi Coated filter (CPL)

- Removes unwanted reflections from non-metallic surfaces such as water or glass and also saturate colors providing better contrast. The effect can be seen through the viewfinder and changed by rotating the filter. The filter factor varies according to how the filter is rotated and its orientation to the sun.

Warming filters (intensifier)

- Warming filters control the bluish coloration that affects daylight film.
- Remove excessive blue from the effects of electronic flash to a warmer color and makes the color of human skin look healthier. Excellent filter for portraiture

Package includes:

- MC Ultraviolet filter
- MC Circular Polarizer filter
- MC Warming filter
- Bonus: filter pouch

Available in:

- 37mm - [APFTK37] UPC#: 811709016885
- 46mm - [APFTK46] UPC#: 811709016908

ZEIKOS®

Digital Multi Coated Ultraviolet + Circular Polarizer

Digital Multi Coated Ultraviolet (UV) Protector
APUVF58
UPC#: 811709016366

key features:

The Digital UV filter absorbs the ultraviolet rays which often makes outdoor photographs hazy and indistinct. It is a multi-purpose fine-weather filter for color as well as black and white photos and also serves as a permanent lens protector.

Available in:

- | | | |
|-------------------------------------|-------------------------------------|-------------------------------------|

Digital Multi Coated Circular Polarizer (CPL) Filter
APCPF58
UPC#: 811709016427

key features:

Light rays which are reflected by any surface become polarized and polarizer filters are used to select which light rays enter your camera lens. The Circular Polarizer filter allows you to remove unwanted reflections from non-metallic surfaces such as water, glass etc. It also will enable colors to become more saturated and appear clearer.

ZEIKOS®

Variable Range Neutral Density (ND) Filter

Variable Range Neutral Density (ND) Filter

APVND58

UPC#: 811709017103

key features:

- Reduce brightness without affecting color or depth of field
- Offer 2 to 8 stops of neutral density
- To decrease the effective ISO of high speed film (above ISO 400) and allow it to be used outdoors in a bright situation
- To allow cine, still and video cameras (which have fixed shutter speeds) to film subjects such as snow, sand or other bright scenes which could cause overexposure
- To enable slow shutter speeds to be used, especially with high speed films, to record movement in subjects such as waterfalls, clouds, or cars
- To decrease depth of field by allowing wider apertures to be used, which helps separate subjects from their background

Available in:

46mm - (APVND46) UPC#: 811709017073
 52mm - (APVND52) UPC#: 811709017080

ZEIKOS®

ETTL Off-Camera Shoe Cord

- 2 feet heavy-duty coiled cable & features a shoe mount on the bottom of the flash connection shoe, as well as a 1/4"-20 socket.
- Maintains all on-camera flash functions (including E TTL II) for one Sony-compatible shoe-mount flash unit used off-camera at distances up to 2 feet (0.6 metres).
- Compatible with Sony A Series Digital SLR cameras that use dedicated features of the flash
- Helps to achieve off-camera flash photography results without the harsh shadows behind your objects common when using direct flash exposures.
- Features a molded shoe on one end that slides onto the camera hot shoe and locks to prevent accidental dislodging of the shoe.
- You can stretch the cord by up to 2 feet (0.6 metres) long & away from the camera in any shooting degrees you wish to point the flash towards your intended subject.

AGFAPHOTO

AF Digital Macro Extension Tube Set

3 tubes included (13mm/21mm/31mm tubes)

*camera not included

Extension tubes are designed to enable a lens to focus closer than its normal set minimum focusing distance. Getting closer has the effect of magnifying your subject (making it appear larger in the viewfinder and in your pictures). They are exceptionally useful for macro photography, enabling you to convert almost any lens into a macro lens at a fraction of the cost while maintaining its original optical quality.
